FALCONWOOD INC.

About Falconwood, Inc:
Falconwood, Inc. is a small, woman/veteran-owned business providing executive level consultants and programmatic support to Department of Defense (DoD) Information Technology (IT) initiatives and programs.

We provide expert consultation on a diverse range of IT subjects focusing on acquisition strategy, implementation activities and Information Assurance policy and engineering.

We have an immediate opening for a **Cloud Services Architect** to perform multiple tasks related to development of the Cloud Services Architecture for the U.S. Navy.

Job Code: FWI-ARC-NAVIFOR

Duty Location:
Arlington, VA or Washington, D.C.

The Architect will:

- Support the development of the Navy's IT cloud/service architecture.

- Provide the cloud/service architecture oversight required for driving the efficient development of high-quality architecture products within the program.

- Support the client and team in designing, developing, delivering, and maintaining operational, technical, and system architectures products that illustrate both the "as-is" and "to-be" cloud architecture for the program.

- Conduct detailed analysis between architectures that results in a clear articulation of gaps, and develop roadmaps for addressing those gaps.

- Stay up-to-date on the latest industry cloud trends and technologies, and make well-supported recommendations for employment of the most efficient and effective technologies and procedures.

- Work with subject matter experts and other architects and engineers to determine solutions to problems, and provide clearly articulated recommendations.

- Communicate the benefits of recommended cloud architecture design to key stakeholders.

- Develop and update senior leadership briefs.

FALCONWOOD INC.

Required Qualifications:

- Minimum SECRET clearance

- Bachelor's degree or equivalent related experience

- Experience with building technical roadmaps and target architecture products, including DoDAF views

- Experience with multi-tenant Cloud architecture and service-oriented architecture (SOA)

- Experience in working with a Cloud broker, ITSM, and service delivery models, including IaaS, PaaS, and SaaS

- Experience with virtualization, hyper-converged infrastructure, and SDN

- Experience with network performance management and Cloud orchestration tools

- Experience with unified communications or mobility

- Working experience with DoD network environments

- Proficiency in Microsoft Project, Visio, Word, PowerPoint, Access, and Excel

- Exceptional written and oral communications skills

- Possession of excellent data gathering, analytical, and problem-solving skills

- Ability to collaborate within a team environment, while meeting strict deadlines and keeping the overall project on schedule

- Ability to both work in a fast paced and dynamic environment on short term projects and the ability to work on longer term projects requiring extended planning time

- Excellent customer/client management skills and techniques – internal and external

- Strong planning, organizational, program/logistics coordination skills with attention to detail and high conscientiousness, high integrity

- Ability to exhibit flexibility, initiative, and innovation

- Self-reflective, open to feedback, and willing to adjust as needed

Desired:

- Experience with Joint Information Environment (JIE) or Joint Regional Security Stack (JRSS)

- Experience with the Next Generation Enterprise Network (NGEN)

- Experience with the Navy's Directorate of Consolidation and Application Optimization (DCAO)

- AWS or VMware Architect or Professional Certification or equivalent

- FEAC Certified Enterprise Architect Certification

- ITIL v3 Foundations certification
