

FALCONWOOD INC.

About Falconwood, Inc:

Falconwood, Inc. is a small, woman/veteran-owned business providing executive level consultants and programmatic support to Department of Defense Information Technology (IT) initiatives and programs.

We provide expert consultation on a diverse range of IT subjects focusing on acquisition strategy, implementation activities and Information Assurance policy and engineering.

We support the total lifecycle of Information Technology systems and applications.

We have an immediate opening for a **Senior Technical Analyst** with a technical background and experience with technology products, services, and processes who understands information technology (IT) life cycle to develop the Next Generation Network (NGEN). If you want to be part of a dynamic team and would to make a positive contribution to the Navy Marine Corps Intranet (NMCI) enterprise network, largest Intranet in the world, then this challenge is for you.

Job Description

The **Senior Technical Analyst** is responsible for providing guidance for the NGEN services, systems and subsystems. The Senior Technical Analyst must have fundamental knowledge of the Navy Marine Corps Intranet (NMCI) enterprise architecture or a similar Acquisition Category I (ACAT I) system. The Senior Technical Analyst's job also includes ensuring that the NGEN product baseline (systems, subsystems, and components) supports the Naval Enterprise Networks' (NEN) overall strategy, objectives, and technology modernization roadmap.

Job Location

DC Metro Area, Norfolk, San Diego or Charleston, SC

Duties and Responsibilities

- Provide inputs to acquisition documentation, including: Management Plans; Statements of Work; and Contract Data Requirements Lists (CDRLs)
- Research governing policies and industry standards, and apply them to operational plans, requirements, and processes
- Provide strategic IT recommendations and plans
- Research IT network technologies used to conduct performance management and make improvement recommendations

FALCONWOOD INC.

- Develop and maintain IT process documents, to include Asset Management, Configuration Management, Change Management, Data/Knowledge Management, and Release and Deployment Management

Skill and Specifications

- Ability to understand tech trends, see how they impact NGEN, and how they drive innovation
- Ability to understand technical challenges and make educated trade-offs
- Must demonstrate successful planning and execution of large-scale enterprise networks
- Excellent written and verbal communication skills
- Technical and continuous process improvement background, with experience in information technology (IT)
- Must be able to travel between Washington Navy Yard and Northern Virginia

Education and Qualifications

- 7+ years of applicable and related experience in leading the planning and execution of Information Technology Modernization processes
- Familiarity with Navy command organization and IT infrastructure
- Must have at least an Active **Secret** security clearance (**We can hold TS**)
- Bachelor's degree (MBA or MS preferred)

The following bachelor's/Master's degrees are acceptable

- A Bachelor's or Graduate's degree in Computer Science
- A Bachelor's or Graduate's degree in Systems Science
- A Bachelor's or Graduate's degree in Engineering
