FALCONWOOD INC.

About Falconwood, Inc:

Falconwood, Inc. is a small, woman/veteran-owned business providing executive level consultants and programmatic support to Department of Defense (DoD) Information Technology (IT) initiatives and programs.

We provide expert consultation on a diverse range of IT subjects focusing on acquisition strategy, implementation activities and Information Assurance policy and engineering.

We have an immediate opening for a **User Interface Designer/ Web Developer**. As a member of the Configuration Management team, the User Interface Designer develop solutions to aid the consumption and usability of large, process-based sets of data. This includes determining requirements, developing dashboards, reports, interactive graphics, and meaningful information from integrated datasets. Successful candidate will collaborate with team members and customer stakeholders to revitalizing the user interface/experience of a Configuration Management environment hosted in SharePoint 2013.

Duty Location:

Norfolk, VA or Washington D.C.

Minimal travel may be required.

The User Interface Designer/ Web Developer will:

- Gather client requirements and determine the appropriate solution to achieve objectives
- Improve the "look and feel" of the collaborative portal environment using web development best practices to customize master pages and web parts
- Design and maintain cascading style sheets (CSS) for published view of pages
- Develop interactive vector images and infographics
- Apply consistency and improve user experience with new and existing elements of the portal to include dashboards, reports, and meaningful information from integrated datasets
- Document portal design standards, navigation schemas, site map, and develop wireframes, etc. in support of solution development
- Generate Software Development / Site Design Requirements documentation
- Assist in development of enterprise metadata standards to improve data mining and organization
- Motivated self-starter who can work collaboratively as a team player while keeping projects and goals on schedule

FALCONWOOD INC.

- Think independently and creatively to solve complex, evolving requirements to attain the best solution for the customer
- Demonstrate exceptional written and oral communications skills
- Enthusiasm for learning and staying current with evolving trends and technologies

Qualifications and Education Requirements:
- ITIL v3 Foundation certification (preferred)
- Bachelor's degree or equivalent related experience
- >4 years in Web Development
- >3 years Configuration Management
- Must possess a Final U.S. SECRET security clearance

Preferred Skills:
- SharePoint 2013 customization & development experience
- Proficiency in Adobe Photoshop
- Familiarity with Web trends and best practices for user interface/user experience design
- Experience in Web design, front-end development, testing/debugging and implementation
- Portfolio of developed solutions required
- Proficiency in HTML 4.01 and 5, XHTML 1.1, XML, CSS 2 -3, JavaScript, SVG
- Proficiency with vanilla JavaScript, jQuery, and modern JavaScript front-end development frameworks
- Familiarity with Web development for the following browser platforms: Internet Explorer 8, 9, 10
- Familiar/proficient in concepts of data integration and normalization
- Familiar with .NET Framework
- Familiarity with the Software Design Life Cycle
- Experience gathering and building to requirements for systems development
- Familiarity with Department of Navy (DON) command organization and IT infrastructure
- Excellent communication and presentation skills to executive audiences
  Must possess a Final U.S. SECRET security clearance
