RMF Training Program

Delivering proven training to improve Risk Management Framework knowledge, cyber proficiency, and cost savings

Gain the skills and knowledge required to achieve RMF authorization and maintain system records through Continuous Monitoring.

- Comprehensive start to finish Navy RMF training
- Focused on skills and requirements for all RMF package efforts
- Detailed, in-depth package and tool training
- Delivered through simulated or real eMASS package instances using up to date required processes and tools

Why Falconwood?

- Falconwood professionals have demonstrated RMF timeline reduction (down from 9-months to 6- month on average) due to higher quality package submissions and fewer rework requirements
- Established training program with a proven track record of success and a student survey satisfaction score of 96%
- Cost Savings:
    - Reduced processing time = reduced man hours.
    - Higher quality package submissions means fewer returns for rework
    - Self-sustainment = no reliance on external groups to support the RMF process and continuous monitoring

Key Topics

- Falconwood's proven process for building high quality RMF packages and reducing processing time
- Attaining an Accurate Risk Assessment of your system
- How to attain a Full Authorization to Operate (ATO) and maintain it through Continuous Monitoring
- Building the skills and knowledge base for your RMF team to handle current and future package submissions

FALCONWOOD

RMF Training Program

Our Experience

- Seasoned RMF experts who are experienced Validators/ISSEs with over 50 years of experience in the Navy RMF process
- Experienced trainers led by a Fully Qualified Validator team composed of 10 Validators who have processed over 400 RMF Afloat and Ashore packages with a 96% average performance validation rating
- Advanced level Information Security Certified Professionals with intimate knowledge of Risk Assessment
- Experts in process automation with the latest technologies and tools
- Developed procedures and checklists which established proven time reduction processes adopted by external stakeholders

What our Clients are saying…

"I was extremely impressed with the training provided during the ISSE training. I look forward to sending additional individuals from my command to future training."

– NECC Attendee

"This was great and I'm glad I went! Would definitely be interested in additional training on higher level topics, such as zero trust implementation and 800-53 Rev 5. Thanks for hosting!"

– NAVIFOR Attendee

Detailed Agenda

- **Timelines and Requirements for different RMF efforts**
  - Full ATO and IATT
  - Use Cases
  - CARs and HRRs
  - Year 1, 2, and 3 ASRs
- **RMF Package Requirements**
  - Categorization and Registration
  - HW/SW List
  - Policy Compliance
  - eMASS requirements
  - Physical Security
  - Control Implementation and Testing
    - ACAS
    - STIGS
    - Automation
  - POA&M creation and requirements
- **Step 4 Validation**
  - POA&M inputs
  - Testing traceability
  - STIG compliance
  - Vulnerability Mitigation and Remediation
- **Post Authorization**
  - ASR
  - Cyber Hygiene
  - Policy Updates
